

Service technician | mechatronics engineer (m|w|d)

Klosterlechfeld, Germany

As a leading company in the timber industry and in timber and silo construction, Blumer Lehmann uses the diverse potential of wood innovatively and in the sustainable value-added cycle. Our employees are committed to a wide range of customer projects at our headquarters in Gossau SG, at our locations in Switzerland, Germany and Luxembourg, as well as on assignments around the world.

Your tasks

- You take over the production of our systems, initially in cooperation with the team.
- After a thorough introduction, you plan and draw our circuit diagrams.
- You support the production department with the assembly and wiring of the control cabinets.
- You repair systems in the field - throughout Germany and in neighbouring countries.
- You commission the systems and instruct the customers on site.

Your skills and experience

You have a basic education in electrical engineering or mechatronics and are interested in the topics of mechanics, electronics and software. Preferably you have already gained experience in switch cabinet construction. You actively contribute to our team by looking for improvements. Your greatest motivation is a customer who is enthusiastic about your work. Ideally, you speak German and English and have a class B driving licence.

Our offer

We offer you a job where you can take on full responsibility in an innovative company with flat hierarchies. A supportive team that values respect and reliability as well as opportunities for further training are also part of the overall package.

Have we aroused your interest? Then we look forward to receiving your application via our website.
