Services	General contractor services (GC)
Own products	Fassaden
Construction	2021-2022
Locality	Mondorf-les-bains
Country	Luxembourg

Modular timber construction 'Bâtiment D' – classrooms and offices

The timber modules are made in our own production facility in Gossau. As general contractor, Blumer Lehmann carried out another modular timber construction school building as an extension for the École Internationale Mondorf-les-Bains.

As with the modular timber structure 'Bâtiment E', the schedule for the production and assembly of the timber modules was a real challenge for the project team in charge of the second public building headed by our Luxembourg office.

The two-storey modular timber structure 'Bâtiment D' extension building has a floor area of 1,150 m² and was built of 48 prefabricated room modules. It includes offices, classrooms, meeting rooms, sanitary facilities and utility rooms. The building can be accessed via stairways, and a lift built into the linking section between the 'Bâtiment D' and 'Bâtiment G' extension buildings also provides barrier-free access. 'Bâtiment D' of École International has enjoyed more interior space for day-to-day operations and administration of the school since May 2022.

Modular timber extension #2 for Mondorf school

Mondorf-les-bains, LU

Classrooms with different furnishings are located on the upper floor of the new school building.

The extension in modular timber construction consists of 48 prefabricated room modules.

The meeting boxes in the new school building allow pupils to work undisturbed.

Large, bright classrooms are located on the upper floor.
